Moving Forward

Singapore Polytechnic

- Established 27 October 1954
- 38 Hectares of Lush Greenery

Mission : Life Ready. Work Ready. World Ready

10 Academic Schools

- Design
- Business
- Mathematics and Sciences
- Chemical and Life Sciences
- Singapore Maritime Academy
- Electrical & Electronic Engineering
- Architecture and Built Environment
- Mechanical & Aeronautical Engineering
- Digital Media & Infocomm Technology
- Communication, Arts and Social Sciences

Students

Full-time Diploma

14,910

Continuing Education

19,452

Programmes

47 Full-time Diplomas
10 Part-time Diplomas
8 Advanced Diplomas
15 Specialist Diplomas
6 Diploma Conversion
36 Work Skill Qualification
128 short courses

Alumni

189,929

Staff

1683

2004

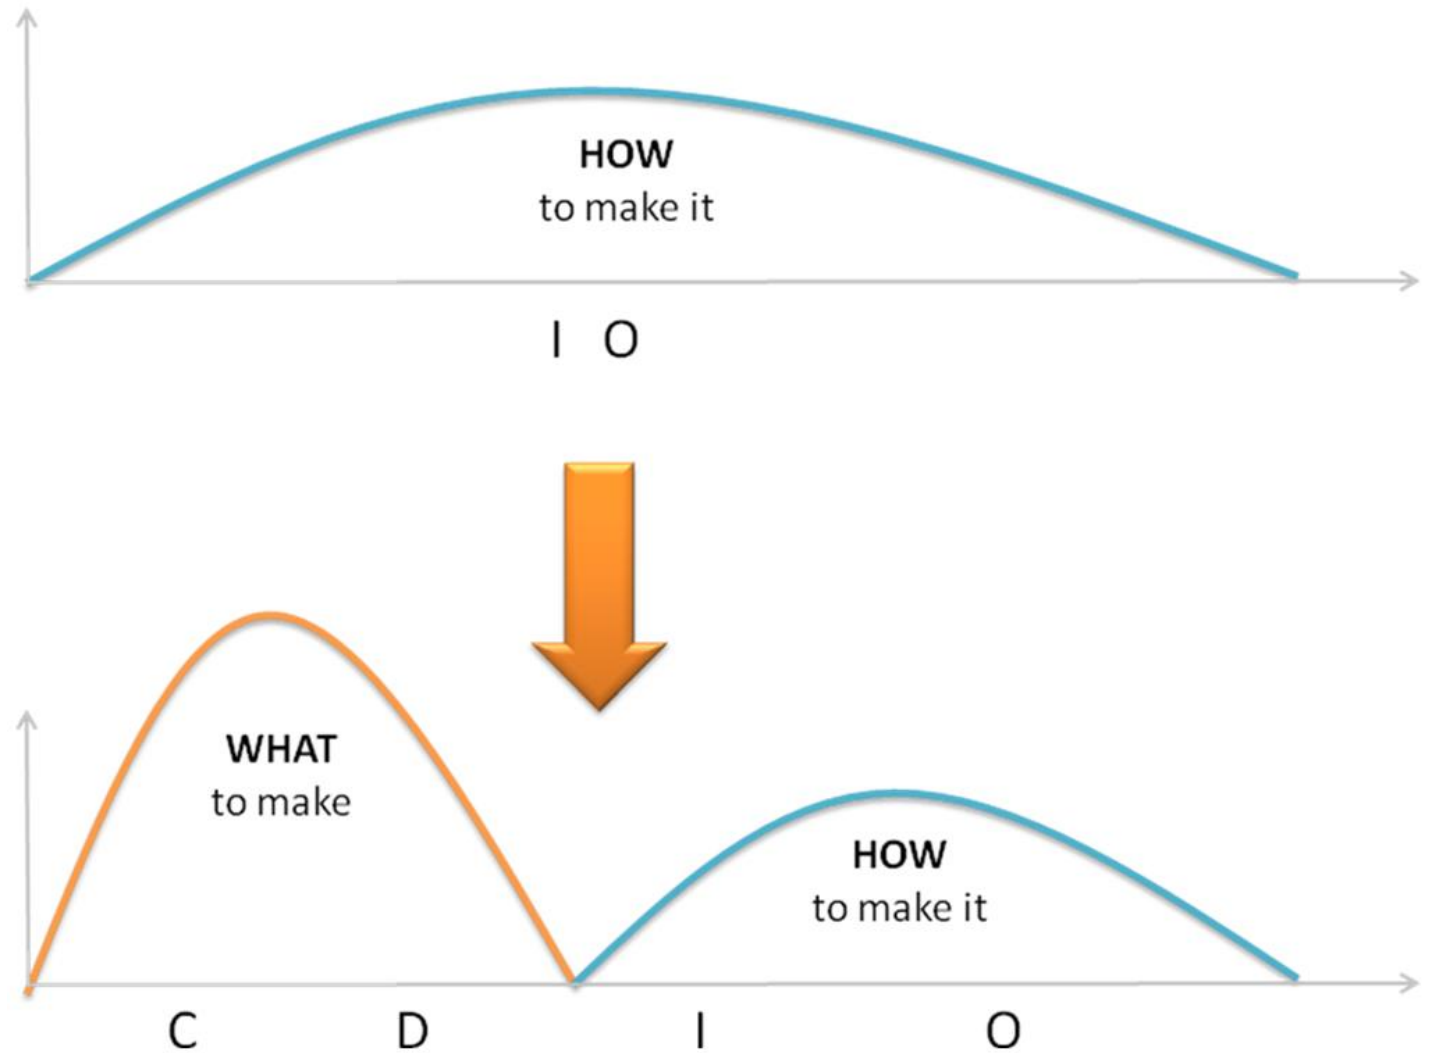

The Challenge

We need to produce graduates who are more
Creative, Innovative and Entrepreneurial (CIE)

Education Model of the Future?

Responding to *The Challenge*

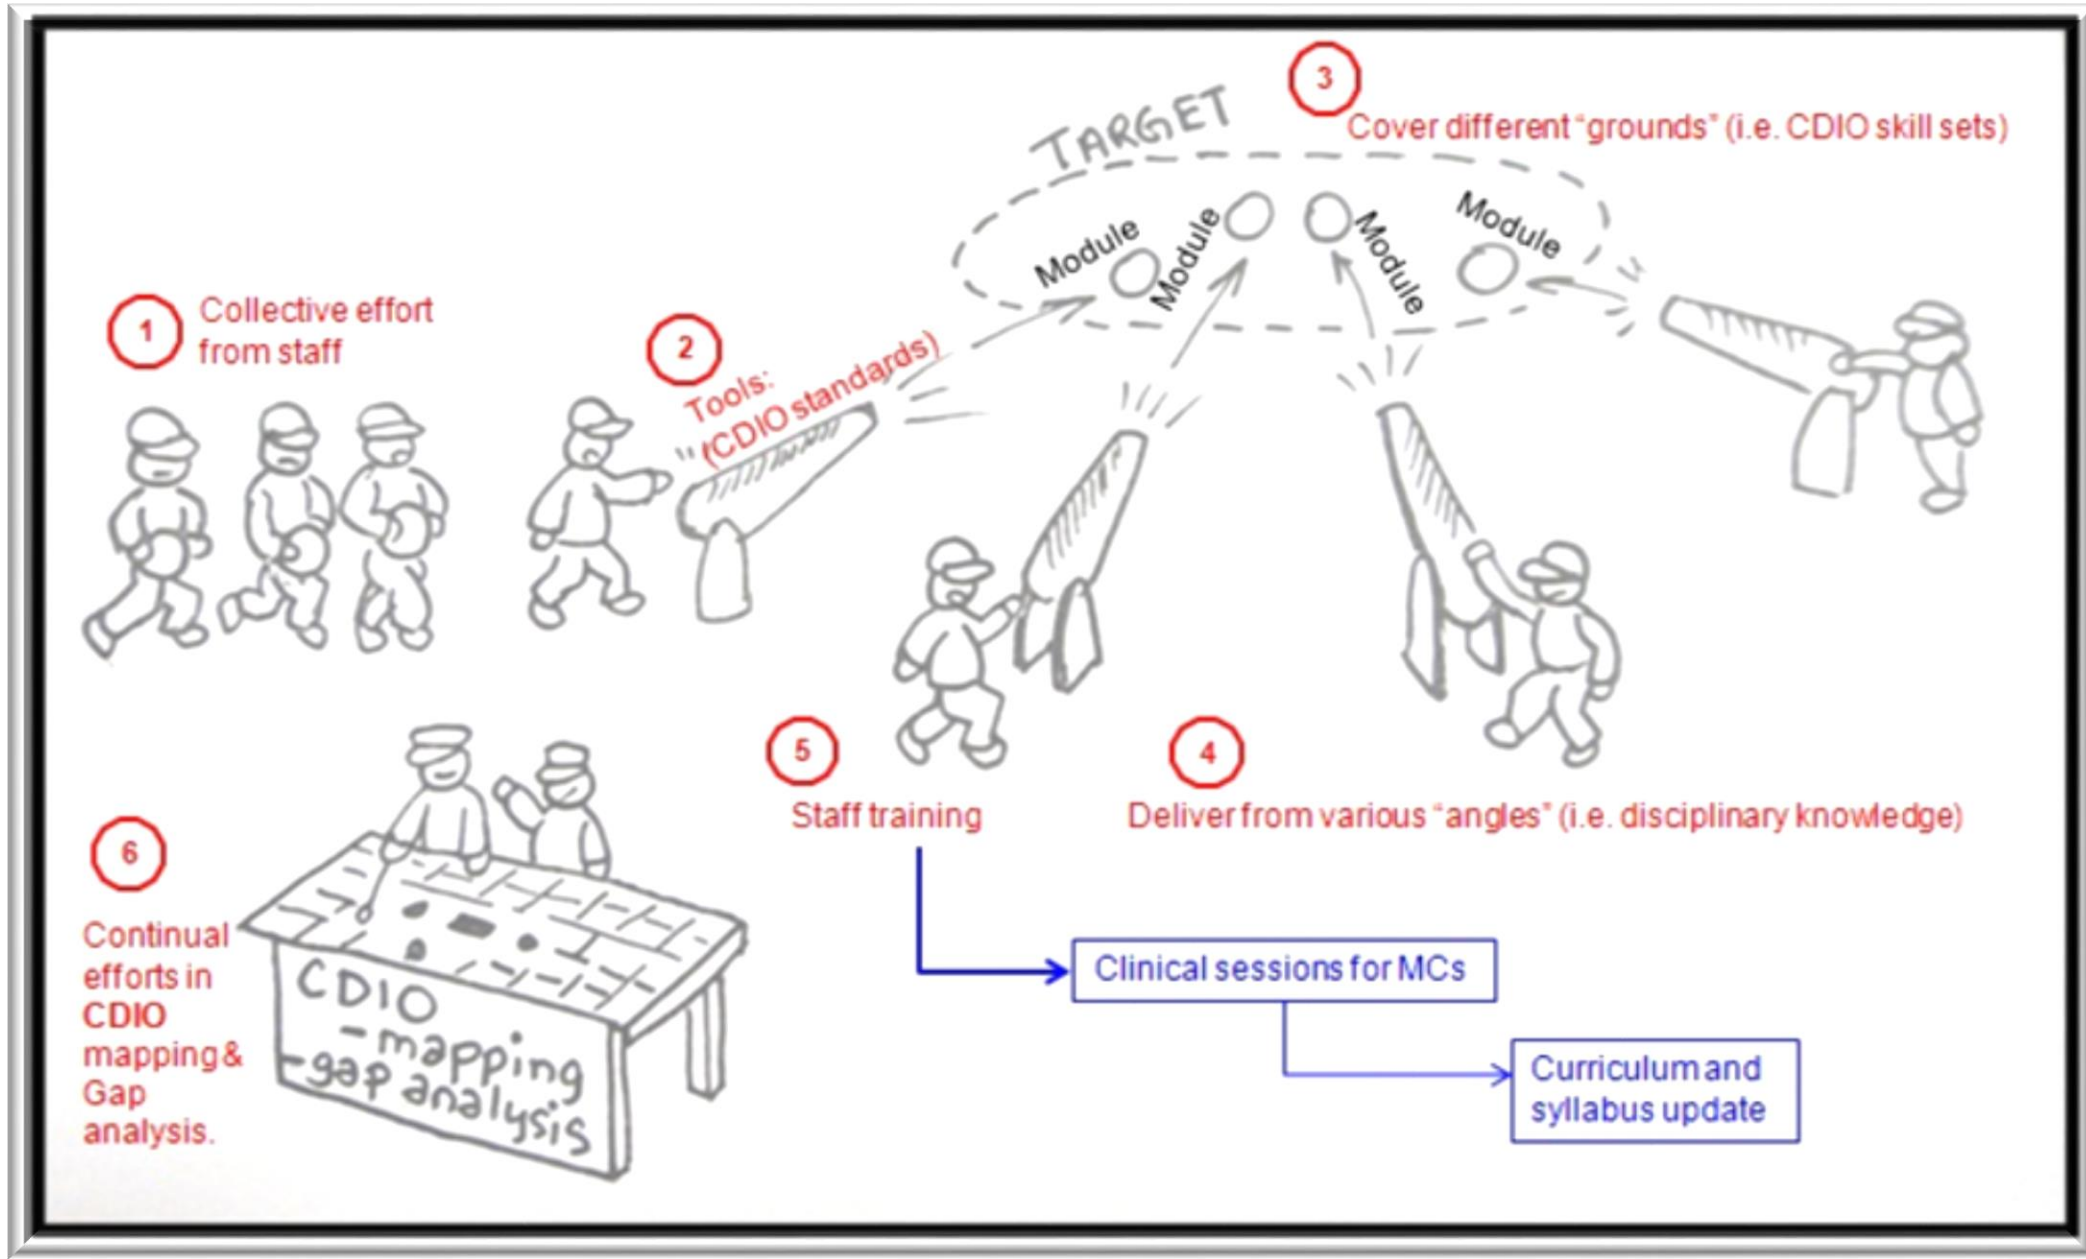

- Pilot CDIO with 20 students
- Convince management
- Joined CDIO in 2004

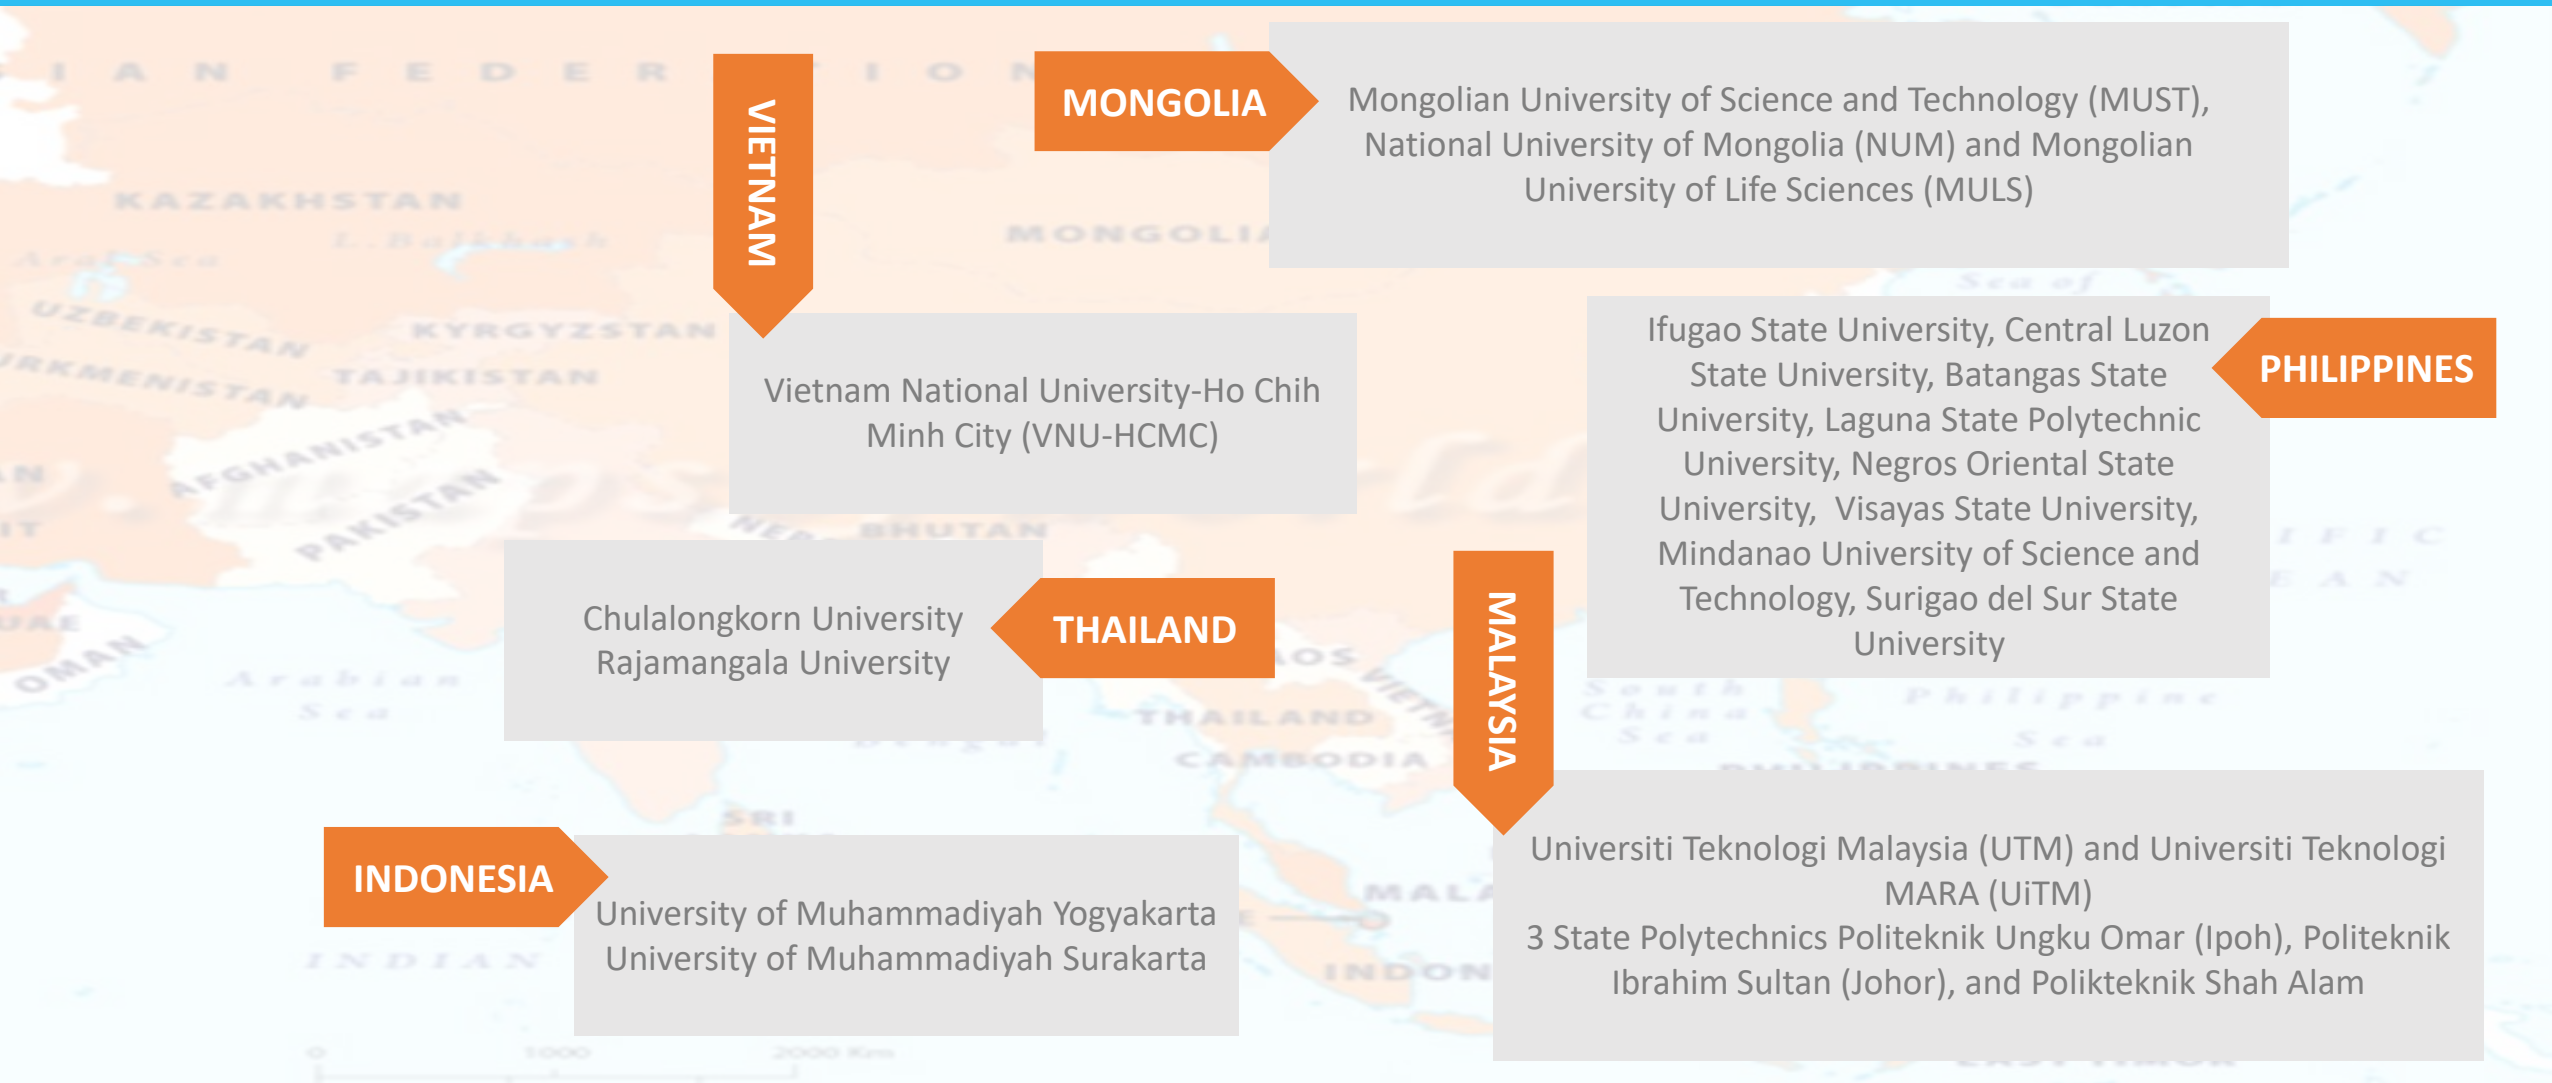

CONCEIVE - DESIGN - IMPLEMENT – OPERATE (CDIO) STANDARDS

1. CDIO as Context
2. CDIO Syllabus Outcomes
3. Integrated Curriculum
4. Introduction to Engineering
5. Design-Build Experiences
6. CDIO Workspaces
7. Integrated Learning Experiences
8. Active Learning
9. Faculty CDIO Skills
10. Faculty Teaching Skills
11. CDIO Skills Assessment
12. CDIO Program Evaluation

2012 - Singapore Polytechnic elected CDIO Regional Centre for Asia

CDIO In Action

Requirement:

- Minimal human intervention
- Zero error
- Compact
- Low noise

Achievement:

- High utilisation rate
- Operates 24/7
- Saves 8,760 man-hours annually
- Capable of storing more than 4,000 bottles
- Handles 80 different bottles' shapes and dimensions

Outpatient Pharmacy Automation System

The Making of the
World's First
Robotic Bottle Dispensing
System (BDS)

Moving Forward

Singapore's Resource Constraints

Nov 2014

SkillsFuture

Building a future based on skills and mastery

Help individuals to make well-informed choices in education, training and careers

Develop an integrated, high-quality system of education and training, that responds to constantly evolving industry needs

Promote employer recognition and career development based on skills and mastery

Foster a culture that supports and celebrates lifelong learning

INDUSTRY TRANSFORMATION MAPS

A strategy to promote growth and competitiveness for 23 industries. Each Industry Transformation Map (ITM) integrates productivity improvement, skills development, innovation and internationalisation. To be developed and implemented in partnership with industry partners, they will help to achieve our vision for the sectors and create good jobs for Singaporeans.

INNOVATION

- Leverage technology to drive innovation and value-creation
- Build enterprise capabilities and sector infrastructure
- Develop own products and brands

INTERNATIONALISATION

- Develop core of globally-competitive local enterprises
- Access global markets through digital channels
- Leverage international networks for market access

PRODUCTIVITY

- Shift towards higher-value added activities
- Drive operational excellence
- Establish shared industry platforms for mass adoption

DESIRED OUTCOMES

FOR COMPANIES

- Strategies that provide integrated assistance across domains
- Stronger support for innovation and internationalisation
- Single govt agency to integrate transformation efforts

WORKERS

new and re-designed jobs with better wages and more opportunities overseas
 longer support for upskilling and skills refreshing

EDUCATION AND TRAINING PROVIDERS

GOVERNMENT

PRODUCTIVITY AND INNOVATION CENTRES

COMPANIES

INDUSTRY ASSOCIATION

JOBS & SKILLS

- Promote manpower-lean enterprise development
- Equip Singaporeans with skills to support the shift to greater value creation
- Develop comprehensive ecosystem for skills development and lifelong learning
- Strengthen enterprise HR capabilities to maximise workforce potential

23 INDUSTRIES

- | | | | | | |
|-------------------------|----------------|-----------------|-------------------|----------------------|----------------------|
| • Energy & Chemicals | • Electronics | • Security | • Land Transport | • ICT and Media | • Hotels |
| • Precision Engineering | • Construction | • Logistics | • Wholesale Trade | • Financial Services | • Food Manufacturing |
| • Marine & Offshore | • Real Estate | • Air Transport | • Healthcare | • Food Services | |
| • Aerospace | • Cleaning | • Sea Transport | • Education | | |

MINISTRY OF TRADE AND INDUSTRY SINGAPORE

Information correct as of September 2016

Industry Transformation Map

(A skills and innovation-driven Economy)*

Jobs & Skills

Industry Manpower Plan (IMP)

Existing & new trends/ job roles/ skills in the IMP are captured and will reside in the skills framework

Manpower Profile
(current, projected, desired)

Skills adequacy & relevance

Career & Wage progression pathways

Skills utilisation, HR practices, Job redesign & workplace conditions

The skills in the framework can be used to design programmes to achieve the desired goals

Skills Framework

Productivity

Innovation

Internationalisation

Individuals

EMPLOYERS

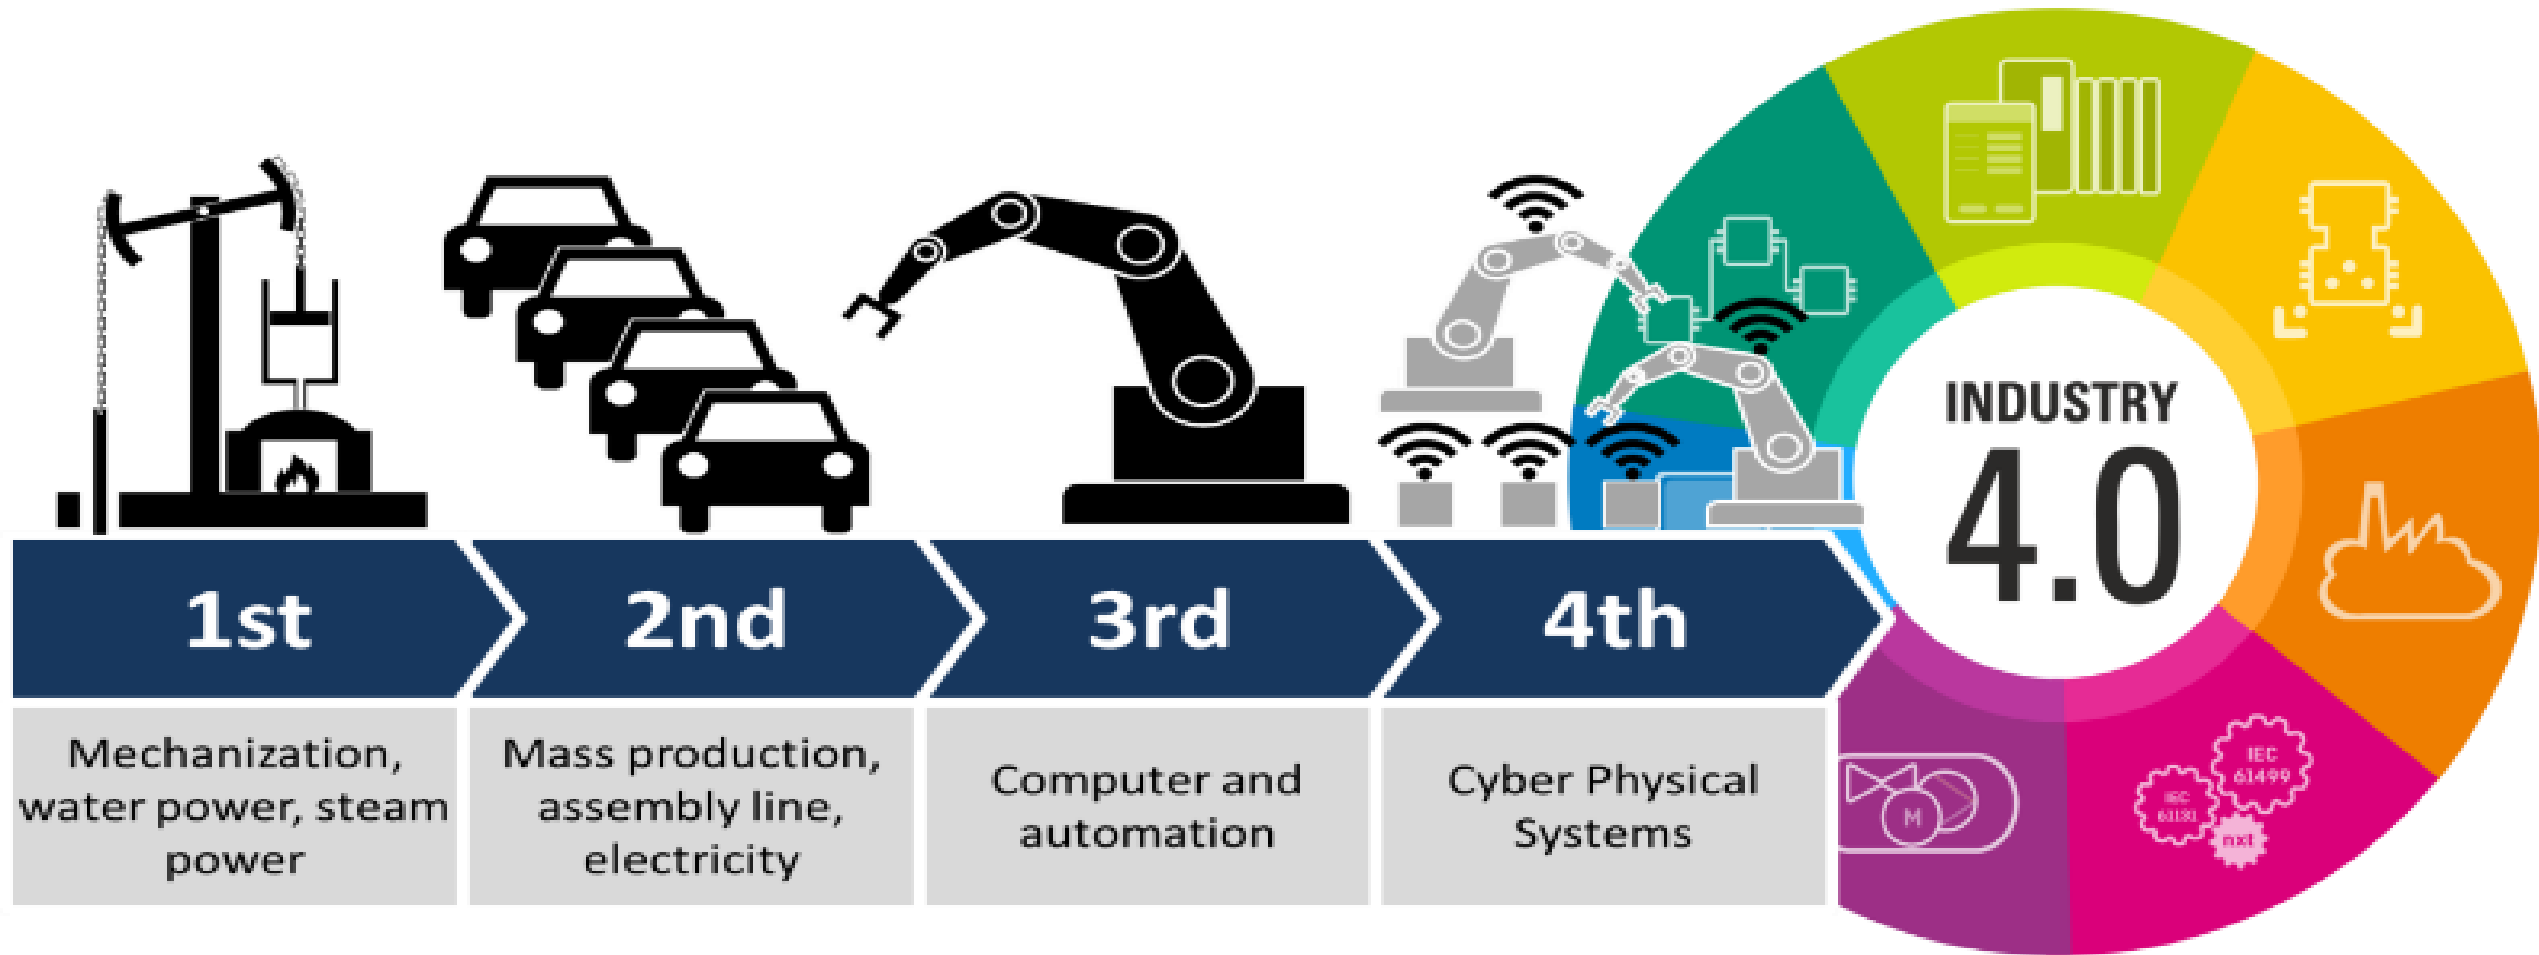

Edn & Trg Providers
(PET & CET)

Govt, Unions, Prof Bodies

Megatrend

An information revolution where everybody & everything is networked

Additive Manufacturing

- From 3D design and simulation
- Produce desired components and parts
- Faster, more flexible and more precise
- Less prototype construction, fewer dies, less post-processing

Collaborative/ Autonomous Robots

- Adapt to real-world variability
- Change applications quickly
- Perform tasks like people do
- Detect people prior to contact

2014

The Challenge

Education Reform to Support Economic Transformation

We need to produce graduates who are
Future Ready and Industry 4.0 Ready

Singapore Polytechnic **Fablab**

FAB FOUNDATION

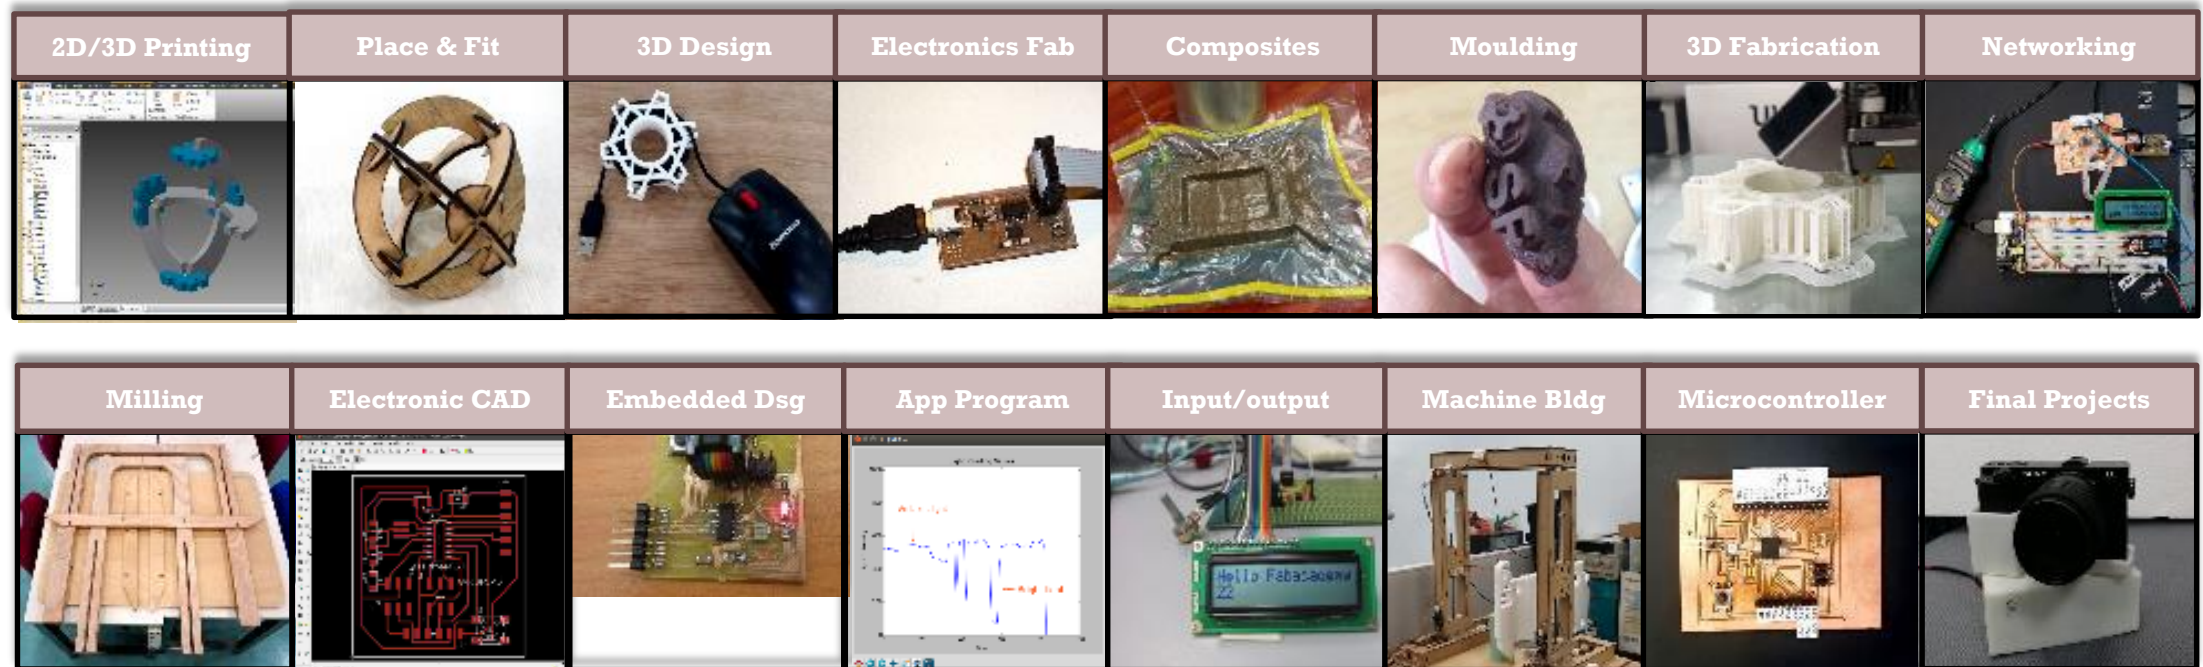

- Created in 2009 from MIT's Centre of Bits & Atoms Fab Lab program
- Mission:
 - * Access to tools and knowledge
 - * Educate, innovate and invent using digital fabrication
 - * Allow anyone to make (almost) anything
 - * Create opportunities to improve lives around the world
- Approximately 1000 FabLabs, including **FabLab Singapore Polytechnic**

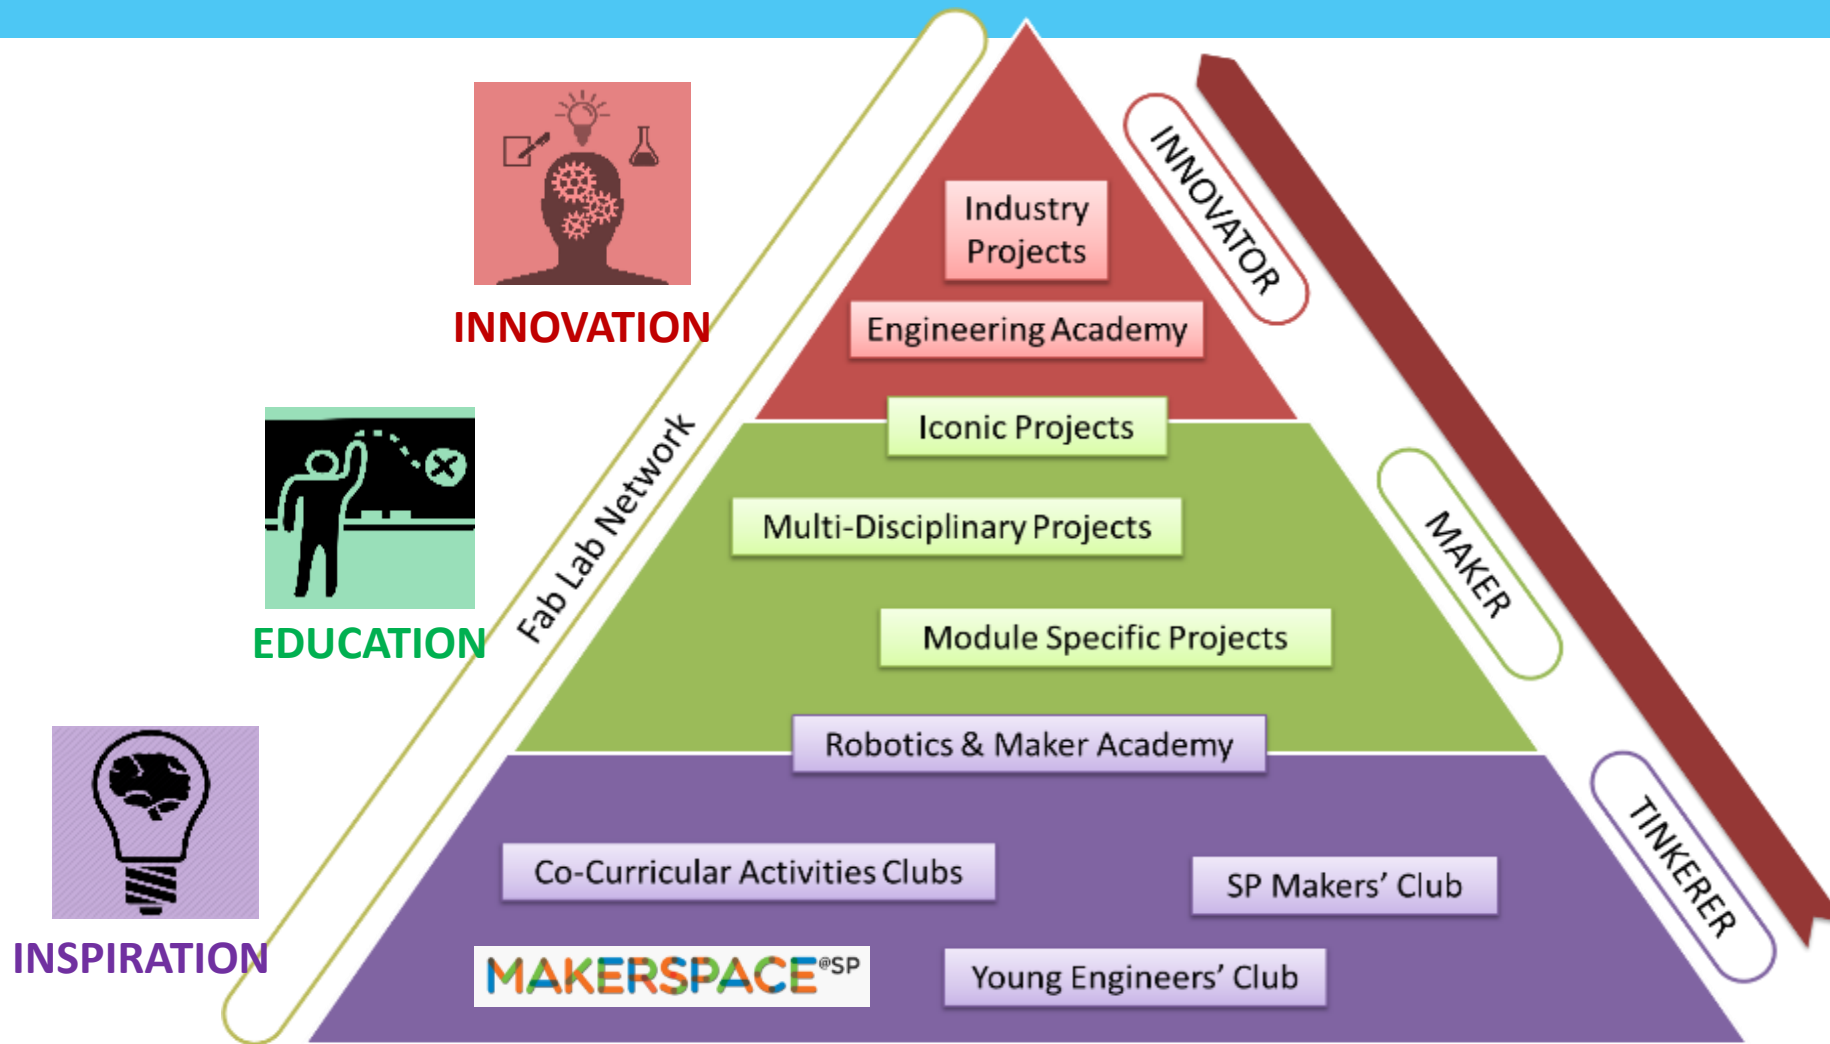

Singapore Polytechnic Staff Development

Roy Ang • Walter Chan • Rodney Dorville
Edward Tay • Chan KC • Steven Chew
Hendra • Mark Ng • Keith Tan
Teo SJ • Tham HL • Yue SC

Dare to DREAM

Dare to DO

SkillsFuture

Recent Student Activities & Projects

GovTech

- Singapore Polytechnic student Julian Kang demonstrating his invention to Minister for Communications and Information, Dr Yaacob Ibrahim.
- The inventive Julian has even developed a prototype gizmo that promises to connect any device to the Internet.

Recent Student Activities & Projects

MFC enabled by IoT

- Student research on Microbial Fuel Cell (MFC): bacteria and waste water to generate electricity
- Problem statement: voltage generated by MFC is logged by hand
- Come to FabLab@SP to discuss with staff & students on realizing an idea
- Conceive & Design: automating data logging for research findings
- Implement & Operate: IoT enabled data acquisition jig for MFC

Recent Student Activities & Projects

Remotely Operated Vehicle (ROV)

- Used in offshore engineering application
- Unoccupied underwater robot
- Allows remote navigation of the vehicle
- Performs underwater hazardous tasks

Recent Student Activities & Projects

Autonomous Guided Vehicle (AGV) with industry

- For a production line, using a wireless charging system provided by industry sponsor SEW EURODRIVE
- Intelligent, autonomous mobile platform delivers materials to designated workplaces
- Allows remote control, mobile data acquisition, wide area monitoring and Industry 4.0 interoperability through Cyber-physical connectivity

graduates*

Industry Value Exchange

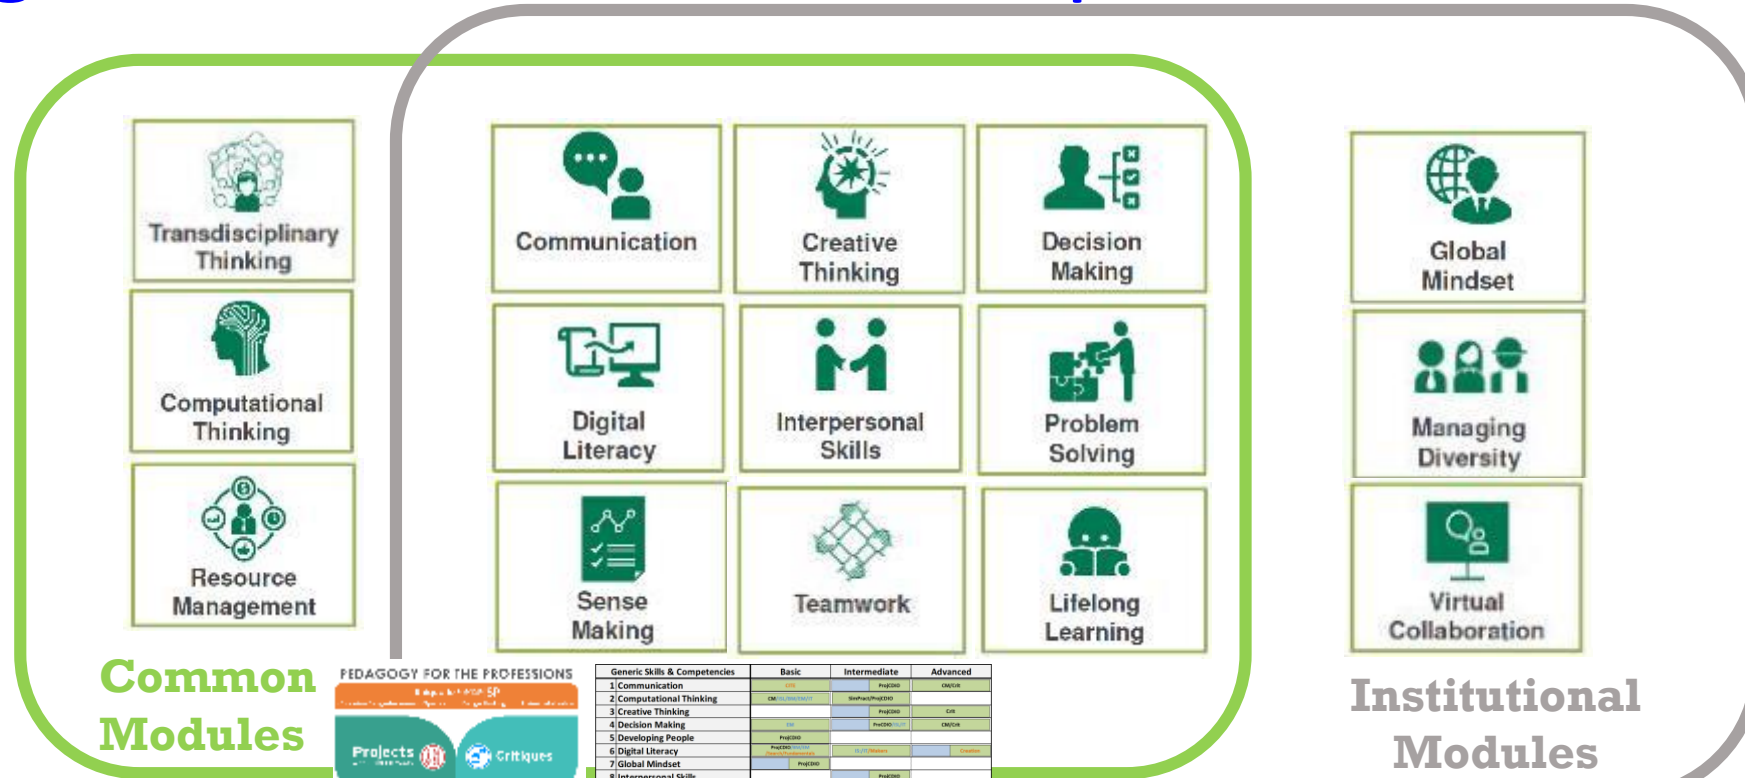

Standard 8 - Active Learning

Singapore Skills Framework

It is an integral part of Singapore's national Industry Manpower Plan to support the growth of an economy based on productivity and innovation.

Mapping of Generic Skills & Competencies

Common Modules

FEDAGOGY FOR THE PROFESSIONS

| Generic Skills & Competencies | Basic | Intermediate | Advanced |
|--------------------------------|-------------|------------------|----------|
| 1) Communication | CM | Proj200 | CE100 |
| 2) Computational Thinking | CM, Proj200 | Proj200, Proj200 | CE100 |
| 3) Creative Thinking | Proj200 | Proj200 | CE100 |
| 4) Decision Making | Proj200 | Proj200 | CE100 |
| 5) Developing People | Proj200 | Proj200 | CE100 |
| 6) Digital Literacy | Proj200 | Proj200 | CE100 |
| 7) Global Mindset | Proj200 | Proj200 | CE100 |
| 8) Interpersonal Skills | Proj200 | Proj200 | CE100 |
| 9) Leadership | Proj200 | Proj200 | CE100 |
| 10) Lifelong Learning | Proj200 | Proj200 | CE100 |
| 11) Managing Diversity | Proj200 | Proj200 | CE100 |
| 12) Problem Solving | Proj200 | Proj200 | CE100 |
| 13) Resource Management | Proj200 | Proj200 | CE100 |
| 14) Sense Making | Proj200 | Proj200 | CE100 |
| 15) Service Orientation | Proj200 | Proj200 | CE100 |
| 16) Teamwork | Proj200 | Proj200 | CE100 |
| 17) Transdisciplinary Thinking | Proj200 | Proj200 | CE100 |
| 18) Virtual Collaboration | Proj200 | Proj200 | CE100 |

Institutional Modules

Course-Specific Modules

| | | | |
|------------------------------|--|-----------------------|--|
| Institutional Modules | General Education Social Innovation Project Communication Education & Career Guidance SP Graduate Attributes | Common Modules | Introduction to Statistical Literacy Basic Mathematics Engineering Mathematics IT & Data Analysis for Business P4P |
|------------------------------|--|-----------------------|--|

Mapping to Diploma in Mechanical Engineering

| S/N | Skills | DME | Status |
|-----|---|--|-------------------------|
| 1 | Apply geometric dimensioning and tolerancing | Computer-aided drafting Design & build Advanced machining & metrology* | Mapped |
| 2 | Performing engineering simulation for design verification | Finite element methods^ Project/Internship | Waiting MOE's reply# |
| 3 | Apply materials characterisation | Engineering materials 1 & 2 Advanced machining & metrology* | Mapped |
| 4 | Apply mechanical fixtures design | Design & build Tooling engineering* | Mapped |
| 5 | Apply precision machining | Computer-aided machining Advanced machining & metrology* | Mapped |
| 6 | Implement engineering activities and processes | Industrial engineering Organisational management | Mapped |
| 7 | Apply measurement metrology in quality assurance | Introduction to engineering Quality engineering & management Advanced machining & metrology* | Mapped |

*Precision Engineering Option only
^Advanced Module

Mapping to Diploma in Mechanical Engineering

| S/N | Skills | DME | Status |
|-----|---|---|--------|
| 8 | Apply workplace safety and health policy | Introduction to engineering Design & build Project/Internship Workplace safety & health management | Mapped |
| 9 | Manage continuous improvement | Industrial engineering Organisational management Quality engineering & management Project/Internship | Mapped |
| 10 | Implement continuous improvement processes | Industrial engineering Organisational management Quality engineering & management Project/Internship | Mapped |
| 11 | Lead workplace communication and engagement | Various CASS modules Organisational management Project/Internship | Mapped |

Conclusion: 10/11= 91% mapped
